E-MAIL: newideas@fcpp.org

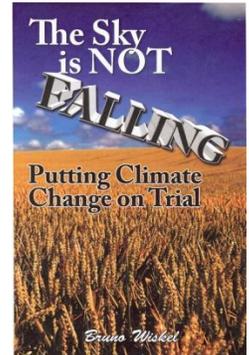

PHONE: 204-977-5050

FAX this form to: 204-957-1570

Watch the science that Al Gore "forgot to mention" in Bruno's dynamic presentation "*The Sky Is Not Falling – Putting Climate Change on Trial*". Bruno Wiskel not only agrees that global warming is happening, but uses the rock record to prove that it has been happening for the last 18,000 years - long before humans had a written language let alone

carbon producing industries. Using scientific logic, he will dispel every misconception you ever had about climate change. "*The Sky Is Not Falling*" is an eye opening expose that uses logical scientific principles to disprove each and every myth that the world's Chicken Littles have used to scare people into thinking that human enterprise is contributing to a fiery death to the planet sometime soon.

Bruno Wiskel Graduated from University of Alberta in 1983 with a BSc. (Honours Geology). After receiving his professional accreditation with the Association of Professional Engineers, Geologists and Geophysicist of Alberta (APEGGA) in 1986, Bruno spent the next 20 years of his career as consulting geologist involved in oil & gas, base & precious metal, and gemstone exploration and now specializes in environmental law. As well as a syndicated newspaper columnist, Bruno has written five published books including "*The Emperor's New Climate - Debunking the Myths of Global Warming*" in 2006 and "*The Sky Is Not Falling – Putting Climate Change on Trial*" which was released in November 2009. Bruno has won numerous environmental awards and accreditations for his conservation efforts including Certificates of Achievement from Environment Canada in 1998 and 2003 as well as being a finalist in 1996 and 2001 for the Alberta Foundation of Environmental Excellence "Emerald Awards".
